

Conserve Water Today!

Join the Sonoma County Water Agency in conserving water in your yard and home today. Below are some tips to help you conserve water:

- **Defer new landscaping planting until fall when planting conditions are more favorable.**
- **Water your lawn in two short cycles rather than one long cycle. By splitting your watering time in half and by repeating it again about one hour later, you will reduce water runoff and water more deeply, which encourages deeper, healthier root development. It also allows the turf to go without water for longer periods of time.**
- **Use a bucket and a hose with an automatic shut-off nozzle when you wash your car, or take your car to a car wash that recycles water.**

And more – visit www.sonomacountywater.org to learn more about water conservation programs and rebates available through your local water supplier.
